Oracle Enterprise Manager 12c
IBM DB2 Database Plug-in

May 2015
Safe Harbor Statement

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, and timing of any features or functionality described for Oracle’s products remains at the sole discretion of Oracle.
Heterogeneous Datacenter Management

Oracle’s Philosophy

• Productize our deep understanding of the Oracle stack to provide integrated management

• Provide generic Oracle solutions for managing non-Oracle technology
  – User Experience Management, Middleware Management, Business Transaction Management, Testing & Test Data Management, ...

• Incent and promote others to provide optimized management for non-Oracle technology

• Provide product extensibility wherever possible (today’s focus: Plug-Ins)
Enterprise Manager 12c Heterogeneous Management
Making The Complex Simple In Three Steps

1. Use or create **plug-ins** using Enterprise Ready Extensible Framework

2. Leverage **common functions** through plug-ins
   - Performance & Availability Monitoring
   - Configuration Management
   - Compliance Management
   - Job System
   - Alerting & Notifications
   - Custom UI
   - Reporting

3. Manage like any other target
IBM DB2 Plug-in
Revamped for Better Performance Analysis and Monitoring

New features

• New Performance page
• Enabled more Metric Thresholds
• 3 Out-of-the-Box Monitoring templates
• Migrated Information Publisher Reports to Business Intelligence Publisher Reports and more!
IBM DB2 Plug-in 12.1.0.4.0

Benefits

Apply Enterprise Manager management and monitoring to your IBM DB2 workloads.

✓ Comprehensive Monitoring
  • Availability, Performance Metrics
  • Alerts, Blackouts
  • Templates
  • Groups/ Systems

✓ Configuration Analysis
  • Detailed configuration collection
  • View/Save/Compare Configurations

✓ Reporting
IBM DB2 Plug-in

Features

- IBM DB2 as EM Managed Target
- Comprehensive collection of monitoring Metrics (~ 390)
  - Buffer Statistics, Memory Statistics, Cache Statistics
  - Locks, Processes, Space Usage
  - Users and Roles
  - HADR Cluster performance and status
- Out-of-box thresholds on key metrics
- 19 Out of the box Reports summarize key configuration and performance data

- Comprehensive configuration management
  - Server Configuration, Database Settings, Registry and Security Settings
  - Ability to View, Search and Compare configurations
- Ability to schedule Jobs
- Ability to kill blocking DB2 Applications
- Ability to Start/Stop IBM DB2 Instances
- Quiesce and Unquiesce jobs for DB2 Databases
- Versions supported:
  - IBM DB2 9.1, 9.5, 9.7, 10.1, and 10.5
New Intuitive UI Dashboards

• Revamped for Better Performance Analysis and Monitoring
• Exposes even more key performance indicators
• Adds additional performance page with advanced investigative capabilities
New IBM DB2 Focused Dashboard Views

- View Database server as well as individual database instance health and availability
- Stop and Start jobs for the database instance and Quiesce and Unquiesce jobs for the monitored Database
- Key health, performance, and availability views
Drill into DB2 Lock Wait and Query Statistics

- View SQL statistics by CPU time and Execution Count
- Break down of Lock Waits by Top Waits by Blocking Application, Top Waits by Blocked Application, Top Waits by Table, and All Waits
Identify Top IBM DB2 SQL Activity

- Identify “Top” SQL queries
- View by CPU Time or Execution Count
- Limit to last Day, Week or Month
Managing IBM DB2 Applications

- Identify “Top” DB2 lock waits by Blocking Application, Blocked Application, Table, and All Waits
- Kill troublesome blocking DB2 applications from within the UI
View Historical Key Performance Indicators

• Cache and Connection KPIs
• Storage and IO KPIs
• SQL Execution KPIs
• View the performance history by Day, Week, or Month
Inventory and Usage Details

- Drill down multiple levels of inventory details
- View different trends in inventory counts charted
Metrics

Hundreds of performance and configuration metrics available for incident thresholds, reports, analysis and comparison.
Drill Down Into Individual IBM DB2 Statistics

- Drill into hundreds of IBM DB2 metrics
- View associated alerts for particular metrics
- Choose to view the metric in real-time or customized historical views
Comprehensive IBM DB2 Metric Thresholds
IBM DB2 Monitoring Templates

• Apply a subset of collection settings to multiple targets

• Standardize monitoring across your enterprise
Enterprise Manager helps you meet the challenges of managing the heterogeneous enterprise

- Comprehensive, top-down visibility into your infrastructure
- Rapid, accurate diagnosis & resolution of complex problems
Incident Manager For IBM DB2 Plug-In
Metric Extensions

Missing a metric your team depends on?

Do you want to integrate custom scripts?

Use Oracle Enterprise Manager’s Metric Extension capabilities to easily expand and customize the IBM DB2 solution with a convenient UI-based development workflow.
Latest Configuration of IBM DB2

- DB2 version and fix pack level
- Platform and OS details
- Relevant DB2 registry settings
- DB Manager Configuration details
Compare IBM DB2 Configurations

**Comparison Details**

- **First Configuration**
  - nod-db105-sles11 (IBM DB2 Database)
  - Collected: May 9, 2015 8:25:33 PM (Latest Configuration)
  - Compare Save Mode: Save Only Differences

- **Second Configuration**
  - nod-db95-sol10 (IBM DB2 Database)

**Job Details**

- Show Differences Only

Reports
Comprehensive out-of-the-box reports

Includes 19 IBM DB2 reports including reports focused on:

• Performance Monitoring
• Configuration
• Storage
Reports
Performance

- In-depth performance reports
- View the SQL query statements consuming the most resources or taking the longest to execute
Reports

Configuration

- In-depth configuration reports
- Reports for database and system configuration
- At-a-glance comparison of key database configuration values
- Schedule a report to identify databases storage utilization
- Identify file growth and location
Plug-ins: Where do you get them?

Self Update: Oracle Provided Content

- Self Update
- Download the IBM DB2 plug-in directly from Self Update
- Delivers new features and updates
- Single console to search, download and manage target plug-ins
- Proactive notification for Oracle supplied updates if running in connected mode
- Supports Online & Offline modes
- Allows import of non-Oracle entities
Plug-In Manager
Single window Solution for all (Un)Deployment

- Integrated with Self Update
- Plug-ins must be deployed to OMS before agents
- Download, Deploy and Upgrade Plug-Ins across OMS and agent
- Option to resume the plug-in deployment. It will start from failed step.
For More Information...

- The IBM DB2 Plug-in is listed in the Oracle Technology Global Price List under: System Monitoring Plug-in for Non Oracle Databases

- Latest IBM DB2 Plug-in documentation for installation, troubleshooting and monitoring metric reference: [http://docs.oracle.com/cd/E24628_01/install.121/e25215/toc.htm](http://docs.oracle.com/cd/E24628_01/install.121/e25215/toc.htm)
