ORACLE SOLARIS CLUSTER STORAGE PARTNER PROGRAM

Oracle's Solaris Cluster Storage Partner Program provides customers with expanded choice of supported third-party storage arrays with Oracle Solaris Cluster. Customers who have invested in non-Sun/Oracle storage infrastructure and want to leverage Oracle Solaris Cluster to increase application and database availability at low risk, can do so.

Under this program customers are given a wider choice of supported storage arrays from leading vendors for their Oracle Solaris Cluster deployments. This program provides customers opportunity to choose among the well-tested storage components to architect their mission-critical Oracle Solaris Cluster deployment. In addition, customers enjoy higher degree of confidence resting assured that both parties jointly respond to support calls.

The following partners are Oracle Solaris Cluster certified. This means each partner has successfully completed the stringent OSCATE test protocols required to establish system compatibility and interoperability.
