

CERTIFICATE No. P245

# CESG INFORMATION ASSURANCE AND CONSULTANCY SERVICES

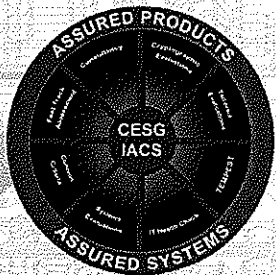

This is to Certify that  
Oracle Identity and Access Management 10g Release 10.1.0.4.1  
running on Red Hat Enterprise Linux AS Release 4 Update 5

has been evaluated under the terms of the UK IT Security Evaluation  
and Certification Scheme and complies with the requirements for:

## EAL4 augmented by ALC\_FLR.3 COMMON CRITERIA (ISO 15408) ASSURANCE LEVEL

The scope of the evaluated functionality was as claimed by the  
Security Target and as confirmed by Certification Report P245

Certification is not a guarantee of freedom from security vulnerabilities.  
This certificate reflects the Certification Body's view at the time of certification.  
It is the responsibility of users (both prospective and existing) to check whether any  
security vulnerabilities have been discovered since the date shown on this certificate.
