

## Oracle Business Intelligence Sample Application- Add On Deployment

Quick Deployment: Step-by-step instructions to deploy EPM 11.1.2.4 on SampleApp v506

### DEPLOY EPM 11.1.2.4 ON SAMPLEAPP V506

#### USE CASE:

Users looking for a full standalone EPM 11.1.2.4 deployment in a separate MW home. For full details on this EPM deployment see the SampleApp Software inventory pdf from the SampleApp Launch Pad, as well as the 1.90 dashboard in BIEE/EPM Configuration

**IMPORTANT:** when deploying/setting up any SampleApp v406 plug and play component ensure there are no other active processes running on your image at the time of setup.

#### DOWNLOAD:

From the [SampleApp OTN home page](#) under the v506 **Optional/plugin section** click on the **EPM11.1.2.4 Plug-in** link to download the epm11124-package.tgz file to /app/oracle directory on your SAV506 image

## EXTRACT:

- Navigate to /app/oracle/ and right click on the EPM 11.1.2.4.zip and choose extract here:

- Extraction will take between 10 to 20 minutes to complete. When finished you will see /app/oracle/epm (you can now delete the epm11124-package.tgz)
- **Your setup is completed**

## STARTING SERVICES:

**IMPORTANT:** use the start scripts located in the Applications/StartSampleApp Services/EPM menu option.

It is strongly recommended you use the EPM Start all script to start all necessary EPM services. The start script will pause several times before finishing- please allow the script to finish completely prior to accessing EPM.- you will be notified by a message of "finish all" when completed

**IMPORTANT:** When using the Start All EPM script your terminal window will return the following message when EPM is ready. You **MUST** keep this window open, closing it will stop your EPM services

## DEPLOYMENT DETAILS

### USERNAMES AND PASSWORDS

all EPM product logons are weblogic/Admin123

<http://demo.us.oracle.com:5000/console> weblogic/Admin123

<http://demo.us.oracle.com:9001/workspace> weblogic/Admin123

### WINDOWS CLIENTS

All available EPM client tools including FR studio and Smartview, HSF client, Taxonomy designer,

Offline Planning, OBI for office can be download from the EPM workspace /install menu options.  
**Import you cannot use EPM client tools that are packaged with OBIEE, they must be the version packaged with your Standalone EPM deployment**

Links

**WLS Console**

<http://demo.us.oracle.com:5000/console>

**APS**

<http://demo.us.oracle.com:9001/aps/APS>

**Workspace and all installed EPM Webapps**

<http://demo.us.oracle.com:9001/workspace/index.html>

**Smartview**

<http://demo.us.oracle.com:9001/aps/workspace>

Note:- In order to use SmartView, first install Smartview client on your desktop. Then launch a Microsoft Office product like Excel.

Create a Private Connection by providing the URL as <http://localhost:9001/aps/SmartView>

Add the server name as [demo.us.oracle.com:1423](http://demo.us.oracle.com:1423).

When prompted for credentials, enter *admin/Admin123*
