REACT QUICKLY TO CHANGING MARKETS

In a constantly changing industry, shippers expect 3PL (third-party logistics) providers to offer additional technical and professional services. And the burgeoning omnichannel marketplace demands more innovation. Meet all of your customers' needs with the power of Oracle Warehouse Management Cloud Service. With the agility to react quickly, you can take advantage of new opportunities and drive revenue.

RAPID IMPLEMENTATION

When attracting and onboarding new clients, speed is key. Customers want to know that their 3PL can get their fulfillment operations moving quickly.

With an on-premises warehouse management system, your 3PL business could be stuck in an extended implementation. Every day that you aren't shipping costs you money. With Oracle Warehouse Management Cloud, you can outpace the competition and implement in weeks, not months.

MULTIPLE CLIENTS, MULTIPLE LOCATIONS

Leverage the benefits of the cloud for flexibility and scalability. Scale your 3PL operation to meet business demands and satisfy your customers.

Manage multiple locations from within one instance, or manage multiple instances for multiple clients in multiple locations. Do all of this with the same signon.

THE CLOUD VERSUS AN UPGRADE

Is your legacy system a couple of versions behind? Are you tired of paying an expensive hourly support rate to fix base issues? Are the people who worked on your implementation still working for your vendor?

Stop waiting for an upgrade. Especially when the latest on-premises fulfillment processes cost as much—if not more—than a complete reimplementation.

With Oracle Warehouse Management Cloud, your 3PL is always on the latest version. In a fast-changing industry, you can take advantage of the latest warehouse management technology with limited downtime and no need for support.

CAPACITY WHEN YOU NEED IT

React at the speed of business. Scale quickly to meet market demands. A dynamic cloud infrastructure enables you to quickly increase capacity so you won't miss any new business opportunities.
