

# Carbon Reduction Plan

Supplier name: Oracle Corporation UK Limited

Publication date: November 2021

## Commitment to achieving Net Zero

Oracle has a target to achieve net zero emissions by 2050, and to halve the greenhouse gas emissions across our operations and supply chain by 2030, relative to a 2020 baseline. This target has been approved by the Exponential Roadmap Initiative, an accredited partner of the United Nations Race to Zero.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline Year: 2020</b>	
<b>Additional Details relating to the Baseline Emissions calculations.</b>	
Emissions data is reported annually by Oracle. All emissions are calculated in line with the GHG Protocol and Reporting Standard <sup>1</sup> and limited assured is performed in accordance with ISO-14064-3 by a third party. UK emission data is summarized below. Full details regarding Oracle's carbon accounting and disclosure process can be found on <a href="http://www.oracle.com/sustainability">www.oracle.com/sustainability</a> .	
Scope 2 emissions are calculated using the GHG Protocol market-based methodology. Per the GHG Protocol, where market-based information is not available, location-based results have been used as proxy.	
Scope 3 emissions are not calculated at a country level. Oracle allocates Scope 3 emissions at a country level using a revenue proxy to allocate a proportion of total emissions. We continue to partner with our third party and value chain partners to obtain country level data for our Scope 3 emissions.	
<b>Baseline year emissions:</b>	
EMISSIONS	TOTAL (tCO <sub>2</sub> e)
Scope 1	801
Scope 2	659

<sup>1</sup> <https://ghgprotocol.org/corporate-standard>

Scope 3 (Included Sources)	79,529
Total Emissions	80,989

## Current Emissions Reporting

Reporting Year: 2020	
EMISSIONS	TOTAL (tCO <sub>2</sub> e)
Scope 1	801
Scope 2	659
Scope 3 (Included Sources)	79,529
Total Emissions	80,989

## Emissions reduction targets

To continue our corporate progress to achieving Net Zero, we have adopted the following carbon reduction targets.

- 100% renewable energy in our Real Estate & Facilities (operations) by 2025
- 100% renewable energy in our Clean Cloud (OCI) by 2025
- 50% reduction in our Scope 3 emissions per the Exponential Roadmap Initiative target setting framework (2020 baseline)
- 25% reduction in our air travel emissions (2019 baseline)
- 80% of key suppliers having emissions reduction targets in place

While we don't measure our targets at a country level, we project that carbon emissions will decrease over the next five years in the UK to 40,500 tCO<sub>2</sub>e by 2025. This is a reduction of roughly 50%. This reduction estimates the impact of Oracle's 100% renewable energy goals and progress towards our 50% reduction of Scope 3 emissions.

Oracle tracks its performance against these goals on its Corporate Citizenship page located at <https://www.oracle.com/corporate/citizenship/sustainability/operations.html>.

## **Carbon Reduction Projects**

### **Completed Carbon Reduction Initiatives**

The following environmental projects have been completed or implemented since inception of Oracle's carbon reduction projects.

- Oracle has a target to achieve net zero emissions by 2050, and to halve the greenhouse gas emissions across our operations and supply chain by 2030, relative to a 2020 baseline. This target has been approved by the Exponential Roadmap Initiative, an accredited partner of the United Nations Race to Zero.
- Oracle has a 100% Renewable Energy Target across our offices and campuses globally that includes a variety of energy saving projects from optimizing space to capital upgrades like LED's and HVAC upgrades.
- Oracle has a 100% Renewable energy target across our Clean Cloud (OCI) footprint. Currently OCI is powered with 56% renewable energy globally. For the 3rd year, the EU is 100% renewable energy powered.
- We set robust supplier engagement goals and adjusted our business processes to further advance the decarbonization of our supply chain. In CY20 72% of Oracle's key Direct suppliers and 63% of our indirect suppliers had emission reduction targets.

In the future we will continue to develop projects around the above themes.

### **Declaration and Sign Off**

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>2</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

#### **Signed on behalf of the Supplier:**
