

2021: Updated with extension of Release 11.2 and Oracle Premier Support through at least 2032

Continuous Innovation on Hyperion EPM 11.2

Oracle is following a “Continuous Innovation” release model for Oracle Hyperion Enterprise Performance Management 11.2, delivering ongoing applications and underlying technology stack updates for 11.2 without requiring a major upgrade. In addition, 11.2 is the long-term support release for Oracle Hyperion Enterprise Performance Management, with Oracle Premier Support available through at least 2032.

With **Continuous Innovation** now available for Oracle Hyperion EPM System 11.2 customers can expect:

Ongoing Applications Updates—ongoing updates to Oracle Hyperion EPM System 11.2 applications code analogous to the 11.1.2.4.x updates we previously made available on an approximate annual basis. Updates will be cumulative and will combine bug fixes and new features into a consolidated patch set that can be easily applied with O-Patch.

Ongoing Technology Stack Updates—ongoing updates to allow for the needed refresh of the Oracle Fusion Middleware platform technologies underlying the Oracle Hyperion EPM System. These will allow customers to obtain new versions of the technology stack without upgrading the Oracle Hyperion EPM System applications code.

Oracle is:

- **Committed to Customers**
Oracle has been a trusted business partner for over 40 years. We help enable you to confidently maximize and expand your existing Oracle Application investments, with ample time for future planning, based on our commitment to support our existing applications via a stable and predictable long-term support policy designed to meet your needs.
- **Committed to Innovation**
Oracle has a long history of innovation and plans to continue product investment for improvement and support going forward with continuous innovation releases. We will deliver new functionality to the covered Oracle Applications Unlimited products: Oracle E-Business Suite, JD Edwards EnterpriseOne, PeopleSoft, Siebel CRM, and Hyperion as updates to the existing release, and major upgrades will not be required to gain access to new features and capabilities. Fixes and updates are cumulative and will be available to you in the most current release.
- **Committed to Products**
Oracle understands that on-premises applications are important for you. We will not discontinue offering Oracle Premier Support on the continuous innovation releases for on-premises applications prior to 2031 and we are committed to annually review whether or not to extend the Premier Support offering for an additional year on such continuous innovation releases for on-premises applications.
