

Oracle Consulting Implementation for Oracle Data Security

In today's complex technology environment, organizations are faced with the challenge of making critical business data available to users while ensuring that internal and external access to this data is tightly monitored and secured. The rapid evolution of security threats and compliance requirements makes this even more challenging.

Oracle Consulting Implementation for Oracle Data Security provides a complete Oracle Data Security solution to address data vulnerabilities increasing confidence that data, at the core of the enterprise, is secure. Oracle provides a portfolio of Database Security solutions that cover Oracle Key Vault, Oracle Audit Vault and Database Firewall, Oracle Advanced Security, Oracle Database Vault Oracle Label Security, and Oracle Data Masking and Subsetting providing a complete solution. Oracle Consulting supports the entire portfolio of Oracle Database Security solutions and has the expertise to deploy or upgrade the right combination for your environment.

KEY FEATURES.

- Oracle Database Security solution based on your unique business requirements.
- Use cases, roadmap and plan for implementing your Oracle Database security solution.
- Implementation of the security solution in your environment by Security Experts.

KEY BENEFITS

- **Expert Guidance** for selecting and implementing appropriate Oracle Security products to meet your business need.
- **Reduced Risk.** Proven leading practices to plan, build and administer Oracle Security services.
- **Custom.** Reference architecture tailored to your environment.
- **Confidence.** Higher degree of confidence that your business critical data is secured.
- **Faster Time-to-Market.** Proven methodology and Oracle Consulting Security Experts accelerate results.

Practical, Cost Effect Approach for Database Security

Oracle Consulting Security Experts conduct an analysis of your current Oracle Database environment, conduct collaborative discovery and analysis workshops to identify requirements, and build a roadmap to close the gap. Oracle Experts will recommend the appropriate Oracle Database Security technologies to meet your requirements and install, upgrade, configure, and integrate the Oracle Database Security solution in your environment. Our goal is to help you achieve a successful database security deployment that secures your most valuable information meeting key regulatory requirements.

Oracle Consulting leverages the Oracle Unified Method (OUM) for a successful implementation. OUM is Oracle's standards-based method that enables the entire Enterprise Information Technology (IT) lifecycle. OUM provides an implementation approach that is rapid, broadly adaptive, and business-focused. OUM includes a comprehensive project management framework and materials to support Oracle's growing focus on enterprise-level IT strategy, architecture, and governance.
