

Oracle Consulting Advisory for Oracle Enterprise Data Security

Data security related incidents can be costly to your business in terms of reputation and recovery costs. Development of a data security roadmap gives you confidence that your data security strategy puts you on the path to securing information at the core of your enterprise, along with meeting regulatory requirements and enabling your organization to address emerging opportunities.

Oracle Consulting Advisory for Oracle Enterprise Data Security is designed to help reduce your data security risk and meet standards mandated by: Sarbanes-Oxley (SOX), Payment Card Industry (PCI) Data Security Standard (DSS) and Health Insurance Portability and Accountability Act (HIPAA).

KEY FEATURES

- Workshops focused on understanding your unique needs.
- Align your data security strategy and initiatives with your business goals.
- Quick, cost-effective way of planning your data security implementation.
- Knowledge sharing with your experts so they can manage your data security initiatives.

KEY BENEFITS

- Leverages Oracle expertise to define your data security roadmap.
- Proven best practices to Plan, Build and Run your secure enterprise.
- Get your team started on the right path to implementing data security initiatives.

A Business-Driven, Practical Approach to Data Security

Oracle Consulting Advisory for Oracle Enterprise Data Security is the first step to implementing a data security strategy. We collaborate with you to develop a practical plan, aligned with your business goals, with recommendations to address identified risks. Oracle Database Security Experts will work with your organization, through a series of workshops, to understand your data security business goals, review your data security strategy along with evaluating your current data security infrastructure. These Experts will identify opportunities for you to better leverage Oracle Data Security Best Practices to mitigate identified risks.

Our service positions your IT organization for a successful data security infrastructure utilizing our proven methodologies, tools and best practices.

Key Deliverables include:

- Workshops to understand your data security goals, strategy and regulatory compliance requirements.
- Review of your current data security infrastructure.
- A phased based roadmap that includes:
 - A data security, capabilities-centric, architecture aligned with your database security governance; and
 - Identified risks, assumptions and recommendations, based on Oracle Best Practices, for your data security initiatives.
