- Utilize Oracle Consulting reusable assets.

KEY BENEFITS

- Leverages Oracle expertise to establish a mobile platform foundation
- Identifies areas of technical risk and provides best practices to build E-Business Suite based mobile apps quickly
- Gets your team started on the right path in building mobile applications using Oracle products and technology
- Provides a comprehensive approach that includes mobile development, integration, security, and application management

Oracle Consulting Enables Your Success

Oracle's Mobile Platform helps you develop mobile applications and secure your mobile applications and data. This platform provides complete support for development, integration, security, and data synchronization to enable your enterprise mobile initiatives. Whether your organization is just beginning to consider its mobile platform strategy or you have already implemented it into your IT environment, Oracle experts can help define your roadmap to mobility. With this Rapid Start offering, our experts will guide your team through everything necessary to configure your Oracle Mobile Suite environment and develop E-Business Suite based mobile applications. These Oracle Consulting Rapid Start services are delivered by consultants who focus on Oracle Mobile Platform and provide vision, expertise, and operational best practices to help you get greater value from your mobile platform investment – with minimal cost and risk.

Oracle Mobile Suite – Expert Installation, Configuration and Implementation

This Rapid Start service is designed to implement Oracle Mobile Suite as a foundation for your Enterprise Mobile Platform and develop a mobile application for an Oracle E-Business Suite based business scenario. This mobile application will be implemented in a development environment, using Oracle best practices applied to your unique business needs.

While the service is flexible and tailored to your particular needs, the following key steps are typically performed during the engagement:

- Conduct requirements analysis sessions for the Mobile Application and finalize “in-scope” features for the Rapid Start engagement.

ORACLE CONSULTING CLOUD SERVICES PORTFOLIO

- Oracle Consulting Architecture Blueprint and Roadmap for Oracle Cloud

RELATED SERVICES

- Oracle Consulting Advisory for Oracle Mobile Platform
- Oracle Consulting Implementation for Oracle Platform Infrastructure

- Install and configure Oracle Mobile Suite in a development environment, integrating it to work with your non-production Oracle E-Business Suite application environment.
- Install and set up developer workstation for iOS and/or Android applications for Oracle Mobile Suite application development.
- Build, test and demonstrate the Oracle E-Business Suite based Mobile application for iOS and/or Android platforms, along with limited required security services.
- Advise your staff on recommended pilot or production deployment approaches.

Oracle Consulting Rapid Start for Oracle E-Business Suite Mobility has key stages: Inception, Elaboration, Construction, Deployment, and Transition. During each stage, we guide you through every step of the process so that you clearly understand the activities being performed, what comes next, and how we best partner together for success.

During *Inception*, we educate your staff on the Oracle Mobile Suite implementation process and outline key roles across our combined teams. We validate your project goals and conduct preliminary interviews to gather functional and non-functional requirements for the use case(s) to be implemented as part of the mobile application. We also perform product installation and setup.

In *Elaboration*, we partner closely with you to firm up the User Interface and Oracle E-Business Suite backend integration design. We also finalize the implementation plan for securing the mobile application at this point.

In *Construction*, we use the requirements previously gathered along with the design, to implement the mobile application using an iterative approach in close partnership with you. This provides you with the best visibility possible into the implementation steps and methodology. We iteratively test the application using simulator and make appropriate changes to enhance the functionality.

During *Deployment*, we work together to ensure that you are ready to release your solution in a pilot mode. We deploy the E-Business Suite mobile application on mobile devices for your key users and demonstrate its functionality.

During *Transition*, we conduct hand over workshops to educate your staff around installation and implementation approach. We also provide them with recommended approaches to enhance and expand the mobile application functionality and take the mobile application to production.

Adopting Oracle's Best Practices Reduces Cost and Complexity

Oracle Consulting Rapid Start for Oracle E-Business Suite Mobility emphasizes a rapid and iterative development philosophy. We foster adoption of best practices put together based on collective experience of Oracle implementation experts.

This approach is ideal for customers that prefer rapid time to value. For customers looking to adopt Oracle Mobile platform, the Rapid Start is an excellent way to establish a blueprint for mobility implementation projects.

How We Are Different

The Oracle Consulting team is focused exclusively on Oracle Technologies, and we have the experts that others turn to for leading practices in Oracle hardware and software implementations. We know how to best optimize your investment in Oracle products and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.

Getting Started

Leverage Oracle's methods, tools, and extensive experience with customer implementations across diverse industries and geographies. Tight integration across Consulting, Development, Support, Education, and Global Delivery puts the entire Oracle team behind your success.
