Oracle's comprehensive line of communications software enables customers to manage and monetize the explosive growth in mobile data traffic and multimedia applications. With Oracle and Tekelec's combined global support services, essential technical assistance and telecom expertise, you can leverage the full potential of your communications networking software.

Complete Support. Incredible Results.

With Oracle, you receive unparalleled expert support, when you need it, on a global scale. Oracle Communications Network Software Premier Support helps you efficiently and securely enable connections for IP and mobile data networks by providing:

Access to service request assistance 24/7. Your staff has immediate access to assistance and the ability to log service requests through the Tekelec Customer Support Center. Additionally, non-technical customer service is available during normal business hours. We provide fast answers and proven solutions based on our experience supporting more than 300 communications service providers in over 100 countries. You can rest assured our telecom experts are there when you need them to help you address the demands of increasingly complex networks.

Essential product updates. The service includes feature-constant updates for your Oracle communications networking software to maintain network performance. That means access to bug fixes, feature constant updates and security alerts to help keep your network current and secure. Remote installation of Oracle Communications Network Software is also included.

Integrated service. Whether you are running a combination of Oracle network software products or a complete Oracle communications solution, you can count on integrated support and updates with a single point of accountability and consistent service worldwide.

Rapid-response software support. When you require software support, we are ready to respond – within 15 minutes for Severity 1 and 2 service requests. Oracle Communications Network Software Premier Support provides Telco-enhanced Service Levels Standards (SLS) for remote response, restoration and resolutions times. Our highly trained technicians leverage their experience, diagnostic tools and vast knowledgebase to quickly troubleshoot and resolve software issues to get your network back on track quickly and effectively.

TL9000 Certified. Oracle Communications Network Software Premier Support provides the world-class reliability and support service you depend on through TL9000 certified processes and best practices.
