Oracle Warehouse Management Cloud

Modern Warehouse Management for the New Fulfillment Economy

We are living in a new Fulfillment Economy that demands more from your warehouse management system.

THE PRESSURE IS ON

Today’s multichannel buyers in both B2C and B2B environments have multiple ways to purchase products. These expanding demand channels have led to a shift in customer experience expectations. However, getting it wrong can have a serious impact on your bottom line.

HOW DOES THIS AFFECT YOUR WAREHOUSE OPERATIONS?

Greater Fulfillment Complexity

- Companies are using multiple fulfillment models to reduce inventory costs and maximize lost sales.
- Expensive shipping costs to meet customer demand: increased storage capacity to deal with an un-optimized warehouse.

Rising Costs

- Trouble rationalizing SKUs and right-size inventory levels.

Lower Inventory Turns

- Secure, stable, flexible and built for the cloud.

WHAT DO YOU NEED TO THRIVE IN THIS NEW FULFILLMENT ECONOMY?

Global Inventory Visibility

- Complete visibility to all inventory from distribution centers down to the store shelf.

Customer Centric Fulfillment

- Support multi-channel demand and execution processes so customers can buy anywhere, fill anywhere, and return anywhere.

Next Generation WMS Cloud Solution

- Secure, stable, flexible and built for the cloud.

WHY BUILT FOR THE CLOUD WMS MATTERS

Let’s face it, most legacy WMS systems are based on outdated architectures, have been highly customized and become difficult to maintain and keep current. A built for the Cloud WMS solution can free you from the customization and upgrade trap and analysts agree that the time for WMS in the Cloud is now!3

Oracle Warehouse Management Cloud combines the speed and savings of the cloud with best-of-breed warehouse management and fulfillment capabilities while giving companies of all sizes a 360 degree view of their inventory.

Cloud-based WMS offers a level of scalability not possible with on-premise WMS3

WMS Cloud solutions help reduce infrastructure costs and reallocation of IT resources3

The increasing adoption of cloud-based WMS applications is a function of market readiness, application availability, and application maturity3

MODERN WAREHOUSE MANAGEMENT FOR EVERY BUSINESS

Oracle Warehouse Management Cloud combines the speed and savings of the cloud with best-of-breed warehouse management and fulfillment capabilities while giving companies of all sizes a 360 degree view of their inventory.
