

Hardware and Software
Engineered to Work Together

Oracle is proud to sponsor a job-training program designed to enhance professional and personal development for qualified veterans injured in Iraq and Afghanistan.

Oracle Injured Veteran Intern Program

About Oracle

With annual revenues greater than US\$37.1 billion and more than 390,000 customers—including 100 of the Fortune 100—and with deployments across a wide variety of industries in more than 145 countries around the globe, Oracle offers an optimized and fully integrated stack of business hardware and software systems. Oracle engineers hardware and software to work together in the cloud and in the data center—from servers and storage to database and middleware, through applications. For more than 35 years, Oracle has helped customers manage their business systems and information with reliable, secure, and integrated technologies.

Oracle's Commitment to Injured Veterans

At Oracle, we are committed to the development and professional growth of injured veterans. Our paid intern program is specifically designed to aid injured veterans of the campaigns in Afghanistan and Iraq in their transition to a career in the private or public sector.

Injured veterans accepted into our program will work closely with Oracle professionals to prepare for a successful future. Interns can engage in on-the-job training in fields such as information technology, technical/systems consulting, technical support, finance, human resources, sales, marketing, Oracle Financials, or developmental training in sales and customer support.
