JD Edwards EnterpriseOne Mobile Solution Strategy

Solution Overview
Safe Harbor Statement

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, and timing of any features or functionality described for Oracle’s products remains at the sole discretion of Oracle.
Mobile Evolution and Challenges
Oracle Mobile
The Heart of Digital Transformation
The World Has Gone Mobile
As consumer engagement swells, so too does IT and marketing budgets and attention

150x Number of times consumers check their mobile devices a day

300% Faster growth for m-commerce than eCommerce

79% Smartphone owners use their mobile devices to buy products or services

$636B Goldman Sach’s m-commerce sales estimate for 2018
By 2017, 50% of today's deployed mobile enterprise apps will be completely rewritten or replaced.

By 2018, more than 50% of B2E mobile apps will be created by enterprise business analysts with codeless tools.

By 2020, lightweight web & mobile-style app integration will completely displace traditional approaches.

Mobile Access
JD Edwards EnterpriseOne Mobile Access

New SKU

JD Edwards EnterpriseOne Mobile Access

• For users who use only mobile applications
• Allows usage of all mobile applications currently available
• Also includes access to custom-built mobile applications
• Includes a license for Core Tools & Technology and System Foundation

• Not necessary for products that are licensed for all employees:
  – Human Resource Management
  – Payroll
  – Time and Labor
  – Health & Safety Incident Management

• Not necessary when users are already licensed for associated modules either through component or enterprise pricing

esource.oraclecorp.com
JD Edwards EnterpriseOne Mobile Access

Business Value

• Makes it easy to license new users who only need access to mobile applications

• You don’t have to worry about trying to figure out all of the products that need to be licensed if the user doesn’t need to access the back-end web applications

• Can be more affordable than licensing products a la carte

esource.oraclecorp.com
License Options for Mobile Applications

• Component or Enterprise:
  • Feature of an existing product
  • To access that feature a user needs a license to that product
• Mobile Access
  • New SKU
  • Mobile-only users
  • Access to all mobile applications only
