Everyday life with

Oracle Adaptive Intelligent Apps

ORACLE ADAPTIVE INTELLIGENT APPS USE

The power of internal data

The power of external data

Provides your customers with better products, recommendations, services and better overall customer experience. Enhance your overall business IQ.

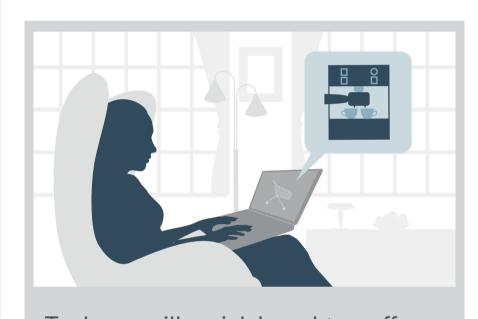

Connected intelligence amplifies the value of CX, ERP, SCM, and HCM. See a holistic picture of your business.

So, how does this apply to everyday life? How does this apply to your role in the business world?

HERE IS AN EXAMPLE

Taylor, a millennial, bought a coffee machine online.

At the coffee shop Taylor goes to, she gets a free hot coffee for every 4 purchases.

Oracle Al Apps personalize and enrich her experience above the norm

free iced coffee with a discount to purchase premium coffee for her coffee maker.

What's adaptive about this scenario?

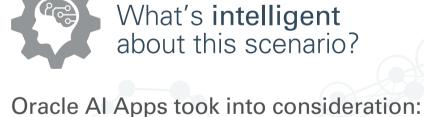

accepts or rejects either of these offers, Oracle Al Apps: Notes her responses

Regardless of whether Taylor

Continuously learns from

her behavior and that of other coffee drinkers Reacts and adapts to new

patterns as Taylor interacts to deliver relevant and personalized offers in the future

Context such as: weather and

location Past Transactions: she purchased

Social Activity: she shared an article on Columbian coffee

The stronger the relationship

an expensive espresso machine

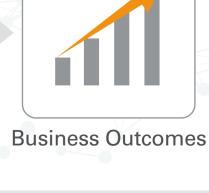

with the brand, the more improved customer loyalty and increased revenue

ONLY ORACLE HAS THE BREADTH, DEPTH AND THE DATA FOUNDATION ACROSS ALL YOUR LINES OF BUSINESS TO DELIVER CONNECTED INTELLIGENCE

intelligent business in real-time, improving business outcomes.
