ORACLE RAPID START FOR ORACLE PEOPLESOFT HCM DATA MASKING

In today’s complex technology environment, organizations are faced with the challenge of making critical business data available to users while ensuring that internal and external access to this data is tightly monitored and secured. The rapid evolution of security threats and compliance requirements makes this even more challenging.

Oracle Rapid Start for Oracle PeopleSoft HCM Data Masking helps you rapidly secure the information at the heart of your enterprise – the database. This service enables organizations to understand how to reduce this risk by irreversibly replacing sensitive data with fictitious yet realistic data in non-production environments so that production data can be shared safely in compliance with corporate and government regulations.

Oracle Rapid Start for Oracle PeopleSoft HCM Data Masking

Oracle Consulting security experts can help you choose and implement the right solutions to secure your unique database environment. Our goal is to help you achieve a successful, short and long term strategy and deployment that secures your most valuable information while ensuring compliance with key regulatory requirements, reduce risk and implementation time.

This service is a low cost, fixed scope one week offering designed to implement a pre-defined masking template for PeopleSoft HCM 9.1. Activities include product installation in sandbox environment, enablement workshop and demonstration of functionality. At the conclusion of this interactive service, you will have access to an operational Database Security component in a sandbox environment, as well as the knowledge and direction you need to fully implement the Oracle Database Masking solution in your organization.

This service will provide your organization with the following:

- Pilot installation and setup of the Data Masking template PeopleSoft HCM 9.1
- The template is compatible with Oracle Enterprise Manager 12C
- Enterprise database security architecture discovery and review
- Audit reporting and compliance requirements discovery and review
- Access to an Oracle Database Security consultant with an in-depth understanding of database security concepts
- On-site interactive delivery with rapid deployment into a sandbox environment

Major Deliverables

- Workshops and pilot implementation: Half-day requirements gathering and security assessment workshops will be led by our security professionals in addition to deploying
WHY ORACLE CONSULTING

- Leading Expertise: Oracle's security experts have depth and breadth across the Oracle Security stack
- Broad Coverage: lifecycle services across the Oracle product footprint
- Global Scale: 13,000 Oracle experts in 145 countries, serving 20+ million users
- Unified Methodology: Based on industry standards, high quality results across complex projects
- Flexible Delivery: Onsite, offsite, and offshore, along with innovative solutions such as Expert Services and Architecture Services

RELATED SERVICES

Assessment Services
Oracle Consulting provides assessment services to help with architecture development, performance tuning, or pre-production launch reviews of:
- Oracle Audit Vault
- Oracle Data Masking
- Oracle Database Firewall
- Oracle Database Vault

Rapid Start Services
Oracle Consulting provides rapid start services to help with architecture development, performance tuning, or pre-production launch reviews of:
- Oracle Audit Vault
- Oracle Data Masking
- Oracle Database Firewall
- Oracle Database Vault

Advisory Services
Oracle Consulting provides expert planning guidance and implementation guidance for:
- Oracle Audit Vault
- Oracle Data Masking
- Oracle Database Firewall
- Oracle Database Vault

a pilot implementation together with customer’s IT and security teams.

- **Deployment and Demonstration**: Implement Data Masking for PeopleSoft/HCM 9.1 solution within one dedicated database environment based on your specific requirements. Demonstrate an example of subsetting for PeopleSoft/HCM 9.1 database
- **Deployment Plan and Project Documentation**: This documentation will describe in detail the deployment architecture and lay out a detailed roadmap for enterprise level data masking & subsetting database security implementation.
- **Presentation and Roadmap**: The Oracle consultant presents findings in-person to a limited audience (determined prior to the engagement) at your facility.

Additional deliverables will be provided that are specific to each solution. For example, for Database Firewall:

- **Sample Reports and Security Policy**: Based on the specific audit/security requirements and captured database traffic, we create a set of specific customized reports and security policies to demonstrate the implementation of database security for a selected database environment.

Optional Services

**Oracle Advisory Service for Data Security**: Provides expert planning guidance and implementation best practices. Our team of engineers works closely with you to assess your current environment and document actionable recommendations for a successful strategy and implementation. The Oracle Advisory Service for Data Security is tailored to your business requirements, time to value objectives and long-term strategic vision.

**Key Activities**:

- Map business requirements to Oracle Data Security core features and evaluate business continuity requirements and goals
- Plan application rationalization
- Provide application and database integration strategies
- Apply Oracle Data Security implementation best practices
- Deliver Oracle Data Security operational readiness recommendations summary

**Extension service**: A continuation of the Oracle Advisory Service for Data Security leveraging the Oracle Architect as a trusted advisor through the full lifecycle with continuation of design planning through implementation and deployment.

How We Are Different

The Oracle Consulting team is focused exclusively on Oracle Technologies, and we have the experts that others turn to for leading practices in Oracle hardware and software implementations. We know how to best optimize your investment in Oracle products and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.

As part of the Oracle Consulting team, our Oracle Enterprise Architects have proven experience in managing complex IT initiatives, in addition to broad deep expertise across Oracle’s portfolio. Oracle takes a practical, approach to Enterprise Architecture and uses
global best practices to help customers realize a faster return on IT investments.

Getting Started

Leverage Oracle’s methods, tools, and extensive experience with customer implementations across diverse industries and geographies. Tight integration across Consulting, Development, Support, Education, and Global Delivery puts the entire Oracle team behind your success.
