A Business-Driven, Practical Approach to Cloud Database Migration

Oracle Consulting can help you realize the value of cloud computing faster and with less risk by leveraging our extensive experience, Oracle leading practices and proven delivery approach. Oracle Consulting will lead the engagement working with your IT team to provision and migrate your organization's Oracle Database(s) 11gR2/ 12cR1 and data from on-premises to the Oracle Database Cloud Service environment. The engagement will include reviewing your unique candidate Oracle Database requirements, defining a target configuration to support the databases, provisioning of the Oracle Database Cloud Service environment, migration of the selected Oracle Database(s) to the Oracle Database Cloud Service environment, and migrate your data to these databases. The engagement concludes with a review of the operational and management features of the Oracle Database Cloud Service with your IT team. This engagement will provide your team with the knowledge, processes, and skills to enable future database deployment to the Oracle Database Cloud Service.

Key Deliverables:

- Workshop to provide an overview of Oracle Database Cloud Service capabilities, benefits and leading practices when provisioning and managing Oracle Database Cloud Service environments including high availability, back-up and restoration, patching and rollback, and scaling out and in.

- Java Cloud Service
