

Do you know about...

Actionable Infolets?

and their role in effective and efficient, task-based processes?

You can do more

- deliver a smarter, more friendly user experience
- show users their most relevant information at a glance
- make it quick and easy to perform common actions
- reduce time looking for and updating data
- deploy Actionable Infolets and Quick Actions for immediate benefits

Administrators can easily implement Actionable Infolets to support common information requirements and actions. See the [Actionable Infolets](#) chapter of the [Implementing Sales](#) guide.

Users can immediately use Actionable Infolets to take quick action on the information most relevant to them. Check this tutorial video including the use of Actionable Infolets in a [Task-Based Home Page](#).

Expected benefits

- Minimize time to complete common actions
- Focus on the most critical selling activities
- More productive sales processes
- More successful and satisfied users
