

Do you know
about...

the enterprise-ready browser-based UI for your service agents!

anytime anywhere access to B2C Service data using Chrome, Safari, and Firefox!

You can do more with the Agent Browser UI!

- Access B2C Service data on any platform - macOS, iOS, Windows, or Android
- Get to your information fast - faster sign in, loading, and saving
- Leverage extensibility with JavaScript extensions
- Deploy and start using immediately - just enable and set up permissions
- Easy maintenance with frequent and automatic updates

Administrators can deploy and configure the Agent Browser UI. For information, see the [Administering the Agent Browser User Interface](#) guide. For information on migrating to the Agent Browser UI, see [Migrating to Agent Browser UI for B2C Service](#).

Agents can access B2C Service anywhere and work uninterrupted. For information, see [Using the Agent Browser user Interface](#).

Some benefits...

- Boost productivity with anytime access to B2C Service information
- Save time & future-proof your business with standard browser technology
- Enhanced user experience with fast, easy-to-use, & extensible UI
- Seamless weekly updates for quick roll-out of new features & resolutions
- No changes to your agents' existing workflow
