

Do you know about...

the News Feed home page layout?

and how it can improve the user experience?

### You can do more

- deliver a FAST home page
- help users be more efficient and effective, and save their time
- improve user experience, including use of Actionable Infolets
- help users focus on what is most important
- switch to the News feed home page for immediate benefits

**Administrators** can switch to the News feed home page appearance option and configure the home page to support the most common information requirements and actions of their users. See the [Configure the Navigator and Home Page](#) chapter of the Getting Started with Your Sales Implementation guide.

**Users** can immediately use the News feed home page to take quick action on the information most relevant to them. Check out the recorded use of [News Feed home page](#) and the [Actionable Infolets feature kit](#).

### Expected benefits

- Fast home page for improved user experience and adoption
- Faster access to your most relevant information
- Streamlined, efficient task flows for common actions
- More productive, successful and satisfied users
