Do you know about... the FAST new search in CX Sales and B2B Service? the Single page access to your data and tasks?

You can do more with **Workspace**!
- speed up your searches and easily refine your search results
- search for a sales or service object and also see related objects
- complete your work on a single page with minimal clicks
- use saved searches defined for your role or personalize your searches

**Administrators** can enable Workspace and Global Search and manage saved searches in the Setup and Maintenance work area. For all this and more, see the **Workspace** chapter of the Implementing Sales guide.

**Users** can access their data fast and take the actions they need without navigating to different pages. For all that you can do, see the **Workspace** chapter of the Using Sales guide.

**Some benefits**

- Drive success with Fast access to Relevant information
- Easily find and maintain high-quality data
- Boost operational efficiency with streamlined workflow
- Accelerate productivity by saving users time
