KNEX PRODUCTS / TESTING SUITE

DATA SHEET

KNEX Testing Suite

KNEX Testing Suite (KTS) is embedded within Oracle Fusion Applications to automate testing after each quarterly update. Leveraging Oracle's next-generation user experience, it empowers users to select, configure, and execute test scenarios across different modules. KTS significantly reduces manual effort required for testing and delivers detailed reports with screenshots of the tests with errors, if any. Developed using Oracle's Robotic Process Automation (RPA) platform, KTS includes an extensibility framework that enables users to add custom tests that are unique to their business.

/ Features

Fully Automated Testing

Automates the end-to-end testing of Oracle Fusion Applications with zero human intervention, powered by Oracle's Robotic Process Automation (RPA).

Self-Service Capability

Offers a business user-friendly, self-service functionality that is embedded in Fusion Applications where users can select test scenarios, configure parameters, and run tests autonomously.

Pre-Built Test Scenarios

The current build supports all the financial modules: General Ledger, Accounts Payable, Accounts Receivable, Fixed Assets and Cash Management

Test Scenario Extensibility

The underlying RPA platform provides built-in capability to extend and add to the pre-built test scenarios. Users can define new scenarios to be executed to test edge cases that are unique to the business.

DATA SHEET

KNEX Testing Suite

/ Features Continued

Error Detection and Reporting
The suite captures screenshots of any errors detected during testing, with customizable options for error reporting.

Customizable Test Data
Clients can override default test values and input their own test data, as well as select specific business units or ledgers, ensuring flexibility for unique business needs.

Fast and Scalable Execution
Executes tests at high speed, significantly reducing testing time compared to manual methods. The suite allows for multiple tests to run in parallel across multiple users and modules.

Comprehensive Reporting
Delivers detailed PDF reports for each test run, featuring success and failure logs, and the option to include screenshots for both successes and errors.

/ Modules Supported

- Accounts Payable
- Accounts Receivable
- Cash Management
- Fixed Assets
- General Ledger
