

Cross-Skill to OCI Workshop for Azure/AWS Architects

Free training plus a limited time offer
for a free live workshop

Migrate skills from AWS or Azure to OCI in one day of learning

Oracle University is offering a chance for AWS and Azure Architects to enhance their skills quickly so that they can start building on the OCI platform without any delay. These cross-skilling courses are free of cost and a limited number of free live workshops will also be available to reinforce the learning and provide additional knowledge to take the learners to the skill level of OCI Architect.

Exclusive live workshops available for a limited time

Access to these workshops is only available for a limited time. The workshops are designed to assist AWS or Azure Architects in translating their skills to Oracle Cloud Infrastructure. This program is available for a limited time and it is recommended to book early. Please note that the invitation does not guarantee access to a workshop. Therefore, it is important to register as soon as possible to secure your spot.

Build skills quickly

Grow your team's skills and knowledge of Oracle Cloud Infrastructure, capitalizing on their knowledge of other public cloud services such as AWS or Azure. They will be better equipped to deploy, manage, and optimize cloud resources effectively, reducing downtime and improving service delivery.

The program offers **self-paced online instruction** and a **live online workshop** to prepare for certification on OCI.

Make the transition easy with self-paced training in Oracle MyLearn

Learn about the differences between AWS, Azure and Oracle Cloud Infrastructure with these two courses:

[OCI for AWS Architects](#)

[OCI for Azure Architects](#)

TOPICS INCLUDE:

- Global Infrastructure
- Compute & Storage
- Application Development
- Identity & Access Management
- Networking
- Databases
- Monitoring & Observability
- Security

Attend the OCI Cross-Skill Live Workshops

- Ask questions about OCI and hear from Oracle University Instructors.
- Discuss OCI topics to bridge your skills from AWS and Azure to OCI.

Earn Course Completion Certificates and Certification

Upon completing the self-paced digital training, you will be rewarded with a course completion badge in MyLearn.

When you earn either the [OCI Architect Associate](#) or [OCI Architect Professional](#) certification, you can proudly share a badge with your colleagues, demonstrating your newly acquired skills.
