

**Darren Moffat – Senior Principal Engineer**

Darren is a Senior Principal Engineer in the Solaris Core Technologies group. He is one of the architects for Solaris Security, and has a focus on authentication, cryptography and application containment. He was also the architect and lead developer for the encryption functionality in ZFS.

He joined Oracle as part of the Sun acquisition, where he was part of the Solaris development organisation. Prior to Solaris development Darren worked in SunService supported Trusted Solaris and other Solaris security functionality.

Darren has also worked for the UK Ministry of Defence and is a graduate of the Computing Science department at the University of Glasgow (Scotland).
