

JD Edwards EnterpriseOne Advanced Job Forecasting

What ■ New system that enables users to create user-defined methods of computation and also create detailed job forecasts based on real-time information from project managers.

Why ■ Minimize project cost and scope increases
■ Timely forecast updates through status checks
■ Accurately forecast remaining costs using forecasted rates

How ■ Forecast calculations based on your business
■ Ability to update forecast data as project changes occur
■ Ability to create multiple forecast scenarios
■ Review and approval processing

Results ■ Accurate project forecasts
■ Audit trail of forecast details
■ Forecast data available across multiple E1 systems
