General Information

How is the range of account IDs increased in JD Edwards EnterpriseOne?

The JD Edwards EnterpriseOne has the ability to generate alphanumeric account IDs. You can use upper case alphabets (A-Z) along with numbers (0-9). This has increased the range of account IDs.

Is this solution only for account IDs?

Yes. JD Edwards EnterpriseOne generates alphanumeric next numbers only for account IDs.

What if I do not want to use alphanumeric account ID?

Use of alphanumeric account ID is optional. To use this solution, you must set up the Use Alphanumeric Next Number (ALPNN) system constant to Yes in the Work with EnterpriseOne System Control program (P99410).

Can I override an alphanumeric account ID in the Next Numbers program?

Yes, you can manually override the starting series of alphanumeric account IDs in the Next Numbers program (P0002).

Are there any guidelines for the alphanumeric format of account ID?

Yes, you must use these guidelines when entering alphanumeric next numbers for account IDs:

- The length of the alphanumeric next number for account ID must be 8 characters.
- Numbers should not precede alphabets.
For example, 1000000A, A1A000A0 are not allowed.
- Special characters are not allowed.

Minimum Technical Requirements

What JD Edwards EnterpriseOne release is required for alphanumeric account IDs?

The solution is available for JD Edwards EnterpriseOne Applications Release 9.2. The minimum Tools Release required is 9.2.9.0.

What if I apply the ESU related to alphanumeric account ID without Tools Release 9.2.9.0?

Numeric account ID generation will work as it is.

Are there plans to make the solution available in earlier releases of JD Edwards EnterpriseOne?

No, this solution will be available only in JD Edwards EnterpriseOne Applications Release 9.2.

Resources

Where can I find other supporting resources for this feature?

You can find documentation and other supporting resources on [LearnJDE.com](https://www.oracle.com/learn/jde).
