

## JD Edwards UX One – Restricted Use License of One View Reporting Frequently Asked Questions

Restricted use license language from section 1.23 of the JD Edwards EnterpriseOne Licensing Information User Manual:

*A license to each JD Edwards EnterpriseOne product containing EnterpriseOne Pages and/or EnterpriseOne Composite Application Framework layouts includes a restricted use license to JD Edwards EnterpriseOne One View Reporting Foundation, with use restricted to viewing EnterpriseOne One View watchlists and EnterpriseOne One View reports distributed by Oracle within EnterpriseOne Pages and EnterpriseOne Composite Application Framework layouts. However, a full use license to JD Edwards EnterpriseOne One View Reporting Foundation is required if customers wish to create new EnterpriseOne One View watchlists or EnterpriseOne One View reports.*

*A license to each JD Edwards EnterpriseOne product containing EnterpriseOne Pages and/or EnterpriseOne Composite Application Framework layouts includes a restricted use license to all JD Edwards EnterpriseOne One View Reporting products other than EnterpriseOne One View Reporting Foundation, with use of each such EnterpriseOne One View Reporting product restricted to viewing analytics distributed by Oracle within EnterpriseOne Pages and EnterpriseOne Composite Application Framework layouts that use EnterpriseOne One View Reporting products to define data selection. However, a full use license to the applicable JD Edwards EnterpriseOne One View Reporting product(s) is required if customers wish to create new analytics using EnterpriseOne One View Reporting products.*

Restricted use license intention:

Our intention is to allow customers to use all functionality included in our UX One pages based on the users' license to the roles' underlying module. This specifically includes license to use One View watchlists and One View components that are included in delivered pages. In simple terms, you can use the One View content we deliver within pages, but you cannot create new One View watchlists or analytics without a full use One View license.

- Q:** Can I use One View watchlists included on an Oracle-delivered role-based EnterpriseOne Page such as the Maintenance Manager landing page?
- A:** Yes. You can use the One View content we deliver within EnterpriseOne pages. Each UX One role-based landing page supports a specific functional product area. Users of these pages are required to be licensed to that functional product. Your license to Capital Asset Management, for example, gives you license to all One View watchlists and One View Analytics delivered by Oracle and included within EnterpriseOne Pages and CafeOne Layouts.
- Q:** Can I create a new One View watchlist?
- A:** No. A full use license of One View Reporting Foundation is required to create new One View watchlists.
- Q:** Can I change the query used by an Oracle-delivered One View watchlist included in a page?
- A:** Yes. Queries are a stand-alone feature that is not a part of One View. Users have the ability to create, edit, and manage queries based on their license of EnterpriseOne Tools.

- Q:** I have license to both Financials and One View Reporting Foundation. Can I add additional One View watchlists to the delivered pages for the Credit Manager role?
- A:** Yes. Your license to One View Reporting Foundation gives you license to create, edit, and manage One View watchlists, and your license to Financials gives you license to the Credit Manager UX One role-based pages.
- Q:** Are the analytics included in delivered UX One Pages part of One View Reporting?
- A:** No.
- Q:** Do any of the analytics included in delivered UX One Pages use One View Reporting?
- A:** Yes. Many of these analytics retrieve data using a query from a One View application. The restricted use license gives users the ability to use these analytics without a One View license.
- Q:** The analytics delivered on the Accounts Payable Manager page look like One View. Do I need a One View Reporting for Financials license to view these analytics?
- A:** No. While many of the analytics delivered by Oracle on UX One role-based pages leverage One View applications for data selection, your license to Capital Asset Management provides you a restricted use license to these analytics that are included in Oracle-delivered UX One role-based pages.
- Q:** Can I customize JET analytics delivered on a UX One role-based page without a One View Reporting Foundation license?
- A:** Yes, as long as the customized JET analytic does not leverage a One View application such as One View Supplier Ledger Inquiry. Customizing an existing or creating a new JET analytic that uses a One View application for data selection requires a full use license to the One View application module.
- Q:** Can I create a new JET analytic and add it to the page without a One View Reporting foundation license?
- A:** Yes, as long as the analytic does not leverage a One View Application.
- Q:** Can I change the query used by an Oracle-delivered analytic on one of these role-based pages without a One View Reporting Foundation license?
- A:** Yes. Queries are a stand-alone feature that is not a part of One View. Users have the ability to create, edit, and manage queries based on their license to Core Tools.
- Q:** Can I create a new One View report and add it to the page without a license to One View Reporting Foundation?
- A:** No. The restricted use license does not allow you to create new One View reports.

The following table lists what is allowed and not allowed:

One View Usage within UX One Role-Based Pages			
Delivered content and features in UX One Role-Based Pages	License		
	Functional Application License	OVR Foundation License	OVR App License
Use delivered One View watchlists	Allowed	Allowed	Allowed
Create new One View watchlists	Not Allowed	Allowed	Allowed
Modify a query for watchlists or One View reports or JET analytics	Allowed	Allowed	Allowed

Modify delivered One View watchlists	Allowed	Allowed	Allowed
Use delivered One View watchlists outside of JDE-delivered pages	Allowed	Allowed	Allowed
View delivered analytics	Allowed	Allowed	Allowed
Customize a JET analytic that leverages a One View app	Not Allowed	Not Allowed	Allowed
Create a new JET analytic that leverages a One View app	Not Allowed	Not Allowed	Allowed
View delivered analytics outside of JDE-delivered pages	Not Allowed	Allowed	Allowed
Create a One View report based on a One View application	Not Allowed	Not Allowed	Allowed
Create a One View report based on a non-One View application	Not Allowed	Allowed	Allowed
