Soar GEN 2
CLOUD MIGRATION

PREPARATION **+** AUTOMATION
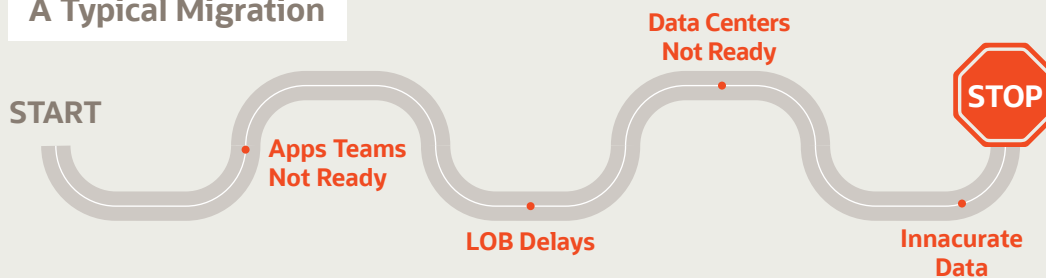

There is a mythology around migrations.

They can be expensive, risky, complicated, slow, and disruptive. That can be true, if the migration is done manually or with the wrong talent. Oracle Soar is a proprietary platform that automates the process of migrating databases or applications to the Cloud. And with Oracle Consulting's Cloud Experts handling the controls, migrations are fast, smooth, and safe.
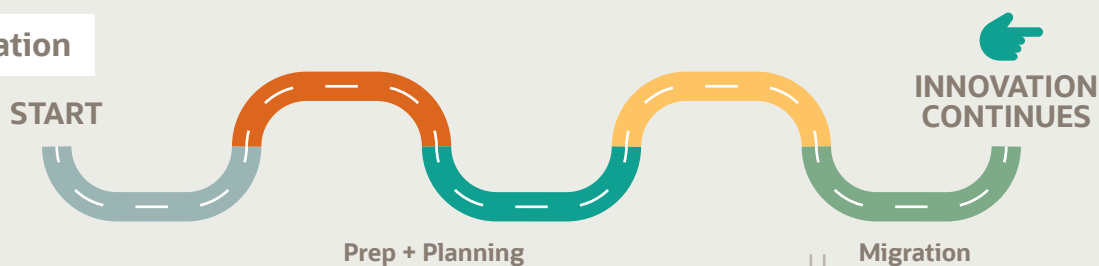

ENERGY TRANSFER

" The automation in *Oracle Soar* helped us achieve an estimated savings of 16,000 staff hours! This time savings enables my IT team to focus their energy on what really matters for the business."

Senior IT Manager, Energy Transfer

A Typical Migration

START

Apps Teams Not Ready

LOB Delays

Data Centers Not Ready

STOP

Innacurate Data

A Soar Migration

START

Prep + Planning

Migration

INNOVATION CONTINUES

PREPARATION + AUTOMATION

The key to a successful migration is preparation and planning. The Soar platform can analyze your entire technology estate with your real data and current business processes, plan, re-plan, and automate your migration to the Oracle Cloud. The experience is transparent, modern, and you pay only when the workload is up and running. *With Oracle Soar, migrations are de-risked because 85-90% of the work is done before they begin*.

Oracle Soar is Rapid, Automated Cloud Migration

Pay-As-You-Go Pricing
- Predictable
- Go at your own pace
- Incentivized for speed
- Pay based on outcomes

Modern and Secure Architecture
- Migration to current infrastructure
- Reduce security vulnerabilities

Reduce Risk and Complexity
- Your real data and processes to prepare and plan
- Increased accuracy with automation
- Continuous platform improvement aligned with Oracle products
- Remote migration, minimizing disruption to your business

Transparent Experience
- What we see is what you see
- Executive and delivery level reporting

One Oracle
- Oracle Cloud expertise
- Aligned to product teams

WHAT WE CAN MIGRATE

APPLICATIONS
- EBS
- PSFT
- SEBL
- JD Edwards
- OMC / OEM
- Hyperion
- Disaster Recovery Deployment
- Custom and 3rd Party Apps
- GoldenGate

DATABASES
- Oracle Databases
- Non-Oracle Databases

AUTONOMOUS DATA WAREHOUSE & ANALYTICS
- Autonomous Data Warehouse
- Oracle Analytics Cloud (OAC)
- OBIEE
- BI Apps
- AWS Redshift

SOAR'S PROVEN METHODOLOGY AND PLATFORM

Oracle Consulting Cloud Experts utilize a three-step process to ensure you properly analyze, plan and execute your successful migration to Oracle Cloud.

1 DISCOVERY — Load & Classification · Capacity Planning · Target Analysis · Wave Plan

2 ESTATE PLANNING — Migration Schedule · Consolidation · Impact Analysis

3 EXECUTION — Provisioning & Readiness · Re-Plan · Migration & Support · Planning & Transition
