

Oracle Managed Identity Services

Identity Management is a cornerstone of the corporate security architecture. It is essential—and often a legislative or industry compliance requirement—to prevent unauthorized intruders by controlling and managing user access efficiently and seamlessly. Oracle Managed Identity Services provide effective end-to-end identity management for customers at predictable cost and without impact to their business operations.

EFFECTIVE RISK PREVENTION AND HIGH END USER SATISFACTION

The ever-growing number of business applications and services exposed to the internet increase the importance of effective identity management. Broad experience is required to prevent risk from the business and meet demanding regulatory requirements while keeping the impact to end users to a minimum.

Oracle identity management offerings are designed to address these needs. To obtain the most protection from these solutions, it is essential to expertly deploy and operate them specifically to customers' unique environments and needs.

Oracle Advanced Customer Services has many years of experience in implementing and managing Oracle identity management solutions in a large variety of scenarios and deployments in Oracle Cloud or on premises.

A tailored portfolio of security services, delivered by senior specialists, provide:

- Expert management of the entire identity management lifecycle including provisioning, change management, auditing, governance, and compliance reporting
- Rapid deployment and operational efficiency at a predictable cost
- End user satisfaction while maintaining the highest protection levels
- The ability to fully leverage the capabilities of sophisticated Oracle incident management offerings in a deployment of the customer's choice
- Coordination by a Security Delivery Manager through periodic status reviews, comprehensive reporting, and proactive guidance

Key Features

- Accelerated uptake of Oracle's identity and access management solutions
- Effective identity management and governance for on-premises and cloud applications
- Complete packaged and managed service for the entire lifecycle

Key Benefits

- Improved security and compliance, lowering risk of data breach
- Optimized protection by fully leveraging the rich features of Oracle security products
- User friendly single sign-on and efficient management
- Proactive detection of threats and strong authentication to combat phishing and malware
- Structured reporting enabling compliance with legislative or business security regulations
- Reduced burden of operating complex identity management infrastructure
- Predictable cost and transparent service delivery

END-TO-END MANAGED IDENTITY SERVICES

SERVICE OFFERING	DESCRIPTION
Managed Identity Cloud Service	<p>Cloud-based identity management and governance for applications on premises or on cloud (IaaS, PaaS, or SaaS).</p> <p>Service features:</p> <ul style="list-style-type: none"> Accelerated configuration of Oracle Identity Cloud Service and identity governance of users, roles, and entitlements Integration with Microsoft Active Directory or other Security Assertion Markup Language (SAML) 2.0 compliant identity providers Managed single sign-on (SSO) or federated SSO with or without multifactor authentication Enforcement of segregation of duties for roles and entitlement requests Comprehensive audit and compliance management through identity certification and reporting <p>Powered by: Oracle Identity Cloud Service (IDCS)</p>
